

RECRUITING SUCCESS

It isn't enough to just provide exposure. What matters is if we get our players to a school where they can **play & graduate** in four years.

Before recommending a school to one of our players we do extensive research to make sure it's a good fit in these five key areas:

- Academic: Is it the right level? Do they offer the right major?
- Athletic: Can our player contribute to this team & at this level?
- Geographic: Big city vs small town? East coast vs west coast?
- Social: Will the school be relatively comfortable & welcoming?
- Financial: Is a scholarship available? Is tuition affordable?

Global Squad consistently achieves the important objective to create 4-year student-athletes. Of the **150+ Global Squad players** who have been recruited, **only six have transferred**.

No other program (that we know of) can match Global Squad's 96% success rate. International student-athletes who get recruited through Global Squad will most likely play & graduate in four years.
